Notes	Where not supplied use original fittings.	dB Killer	SCEXDBK47 - (TYPE PB)

A) Start by loosening the clamp between the OE rear silencer and the OE centre section.

B) Next move onto the upper mounting bolt. This has a nut on the back that you will need to hold with a spanner as you undo the bolt.

C) Support the weight of the silencer and remove the bolt.

D) Carefully remove the silencer from the bike.

E+F) The gasket should stay with the silencer, if it doesn't you should remove it from the pipe as it is not needed when fitting the Scorpion Slip-on system.

G) Place the clamp over the end of the connecting pipe and slide the connecting pipe onto the original system.

H) Slide the Scorpion silencer onto the connecting pipe.

Bike	Honda CMX500 (Rebel)	Part No.	PHA-197
Year	2020-Current	Fit Kit	Z039.10666
Notes	Where not supplied use original fittings.	dB Killer	SCEXDBK47 - (TYPE PB)

I) Mount the rear silencer to the original mounting bracket using the original hardware. At this stage leave it loose to allow adjustment.

J) Fit the springs between the silencer and the connecting pipe.

K) Tighten the clamp between the connecting pipe and the original system.

L) You can now fully tighten the silencer mounting bolt.

Take the bike for a short ride to ensure it functions as it should. Once the bike and exhaust are cool enough check all nuts and bolts are still secure.
